

Pablo Dejuan pablo.dejuan@gmail.com London, UK.

Transformational engineering leader with 20+ years of experience building software and scaling international teams across retail, e-commerce, insurance, and healthcare. Over 7 years in engineering management roles, known for enabling high-performance cultures and driving team growth. Thrives in both startup and scaleup environments, combining hands-on technical depth with strategic leadership. Expert in agile transformations, developer productivity, and cloud-native platforms (TypeScript, Ruby on Rails, AWS). Outside work, I fence épée, hike, and volunteer with CodeYourFuture.

Experience

Software Engineering Manager - Marks and Spencer (London, UK)

Sep 2025 - Current

In Stores Payments, I am leading delivery of next-generation in-store technology that underpins checkout, payments, and operational resilience across the stores. I drive cross-functional teams to modernise legacy systems, improve reliability and security of retail systems.

Software Engineering Manager - Henry Schein One (London, UK)

Mar 2024 - Mar 2025

Managed the 3 teams in Product Experience. Accountable for the delivery performance of 15+ engineers and team leads. Collaborated with the group product manager and stakeholders for the definition of group objectives, implementation of good practices including DORA metrics, performance management, hiring and development of the engineers.

Senior Software Engineering Manager - Prima.it (London, UK)

Sep 2022 - Jan 2024

Managed the Leads subdomain, the Design system and Leads generation teams. Managing 8 reports. Tech stack TypeScript, React, Elm, AWS.

- Reorganised the Conversion department to split into Conversions and Lead generation following domain driven design DDD.
- Switched the delivery of the Design System team to use SemVer, improving internal developer relations.
- Worked with the team to select and implement a content management system into a global product.

Software Engineering Manager II - Pollen (London, UK)

May 2021 - Aug 2022

Oversaw 3 teams with 15 reports (6 direct) focusing on the software and hardware to support operations before and during the event: customer experience, access control and

fulfilment. We improved efficiency by reducing onsite incidents and simplifying procedures for the staff management. Tech stack: Python, Django, AWS, TypeScript/React, Retool.

Software Engineering Manager - Simply Business (London, UK)

Sep 2019 - Apr 2021

Managed Customer & Consultant Journey teams (12 reports, 6 direct), delivering validated online experiences and new insurance products including non-profit and medical products; launched online policy checker during COVID to cut call-center load; re-developed the initial white-label solutions.

Tech stack: AWS, Ruby on Rails, JavaScript, React.

Head of Development - Resolver Group (London, UK)

Nov 2018 - Aug 2019

Led Consumer Group at Resolver, reorganised into 3 teams (12 people); improved delivery quality and throughput by implementing agile practices and cost-effective tooling (Heroku, AWS, Terraform, Codeclimate), collaborating closely with engineers, product managers, and department heads.

Tech stack: Heroku, AWS, Ruby on Rails, JavaScript.

Tech Lead/Engineer - GoCardless (London, UK)

Oct 2017 - Nov 2018

Tech lead of the acquisition team. Architected international website solution and CMS implementation with Prismic; introduced AB testing tools boosting signups; vetted attribution platforms; managed contractors; defined agile processes and aligned OKRs with marketing stakeholders.

Tech stack: Google Cloud, AWS, Rails, JavaScript/React.

Software Engineer - Zalando (Berlin, Germany)

Nov 2016 - Sep 2017

Working in the Local Delivery Network. Improved the development of the frontend solution for the tracking system for ZipCart and the Returns on demand for Zalando ZET (premium).

Tech stack: NodeJS, AngularJS, React.

Sr Engineer / Tech Lead / Product Manager - NetSuite (Uruguay)

Jun 2013 - Oct 2016

Led the developed SuiteCommerce InStore (SCIS). Coded from the early prototypes to go-live, coordinating the integration of cross-team features to enable an omnichannel experience.

- Grew a team of 2 developers into two teams of 12 total with management support, working closely with staff engineers and managers to evaluate new hires, mentored engineers.
- Supported Customer success with key customers, launching in several locations in the USA.

- Co-authored the patent US20180081976A1 on generating a product catalogue for SEO.
- Simplified the configurations of SuiteCommerce Advanced and contributed to the certification program.

2008 - 2013 Software Engineer / Senior Software Engineer

After the master's worked as

- Engineer/consultant for US/UAE clients of GeneXus Consulting (Justice department of Uruguay), Cubox (clients included eTenders, Marqeta), Globant (Autodesk).
- .Net developer, project leader for Elabora Soc Cop (Rome) delivering a dynamic system for management of auditors and balance sheet analysis based on Altman Z-Score.

2003 - 2007 Software Engineer

During the last years of university worked as an intern for Memory Computacion, Grupo Quanam and San Diego softworks delivering web applications for different clients and startups like Seriema, on Java/MySQL and Linux and ASP.

Formal education

Title: **Master in Business Administration** (Oct 2007)

University: ISTAO, Ancona, Italy.

Title: **Bachelor's degree in Computer Science** (Dec 2004)

University: Universidad Católica del Uruguay, Montevideo, Uruguay.

Languages: English (fluent), Italian (fluent), Spanish (native)

Citizenships/work-permit: Uruguayan, Italian, settle status UK

Other activities

Not for profit Event Organisations

Board member and co-organized of the JSConfUY for three years, managing speaker selection, sponsorships, diversity and conference logistics (Apr 2013 - Jun 2016).

Played a pivotal role in NodeSchool Montevideo, teaching NodeJS, translating content to Spanish, and coordinating initial volunteers (Oct 2014 - Apr 2015).

Co-organized Montevideo Valley, an annual event for IT enthusiasts and entrepreneurs (Nov 2008 - Nov 2010).

Volunteering and Teaching:

Volunteered as a coach for Code Your Future - 2025

Volunteered as a coach for junior developers for CodeBar.io (2018 - 2022)

Volunteered with Protagonizar Uruguay, supporting microcredit initiatives (2009 - 2011).

Taught courses on MS.Net WCF, WPF, and LAMP at Universitario Autónomo del Sur (Nov 2009 - Mar 2010).
